

WarmCaller: An App for the Classroom

Bok Department Pedagogy Fellow Capstone Project

Lee Cannon-Brown

Page 1 of this document shows a screenshot of my app, WarmCaller.

Page 2 shows a screenshot of my app's "back end," in case anyone wants to replicate it in Max, a visual programming language.

WarmCaller

1) To include a student in warm calling, type their name in this black box and press "return" on your keyboard.

Who
Will it
Be?

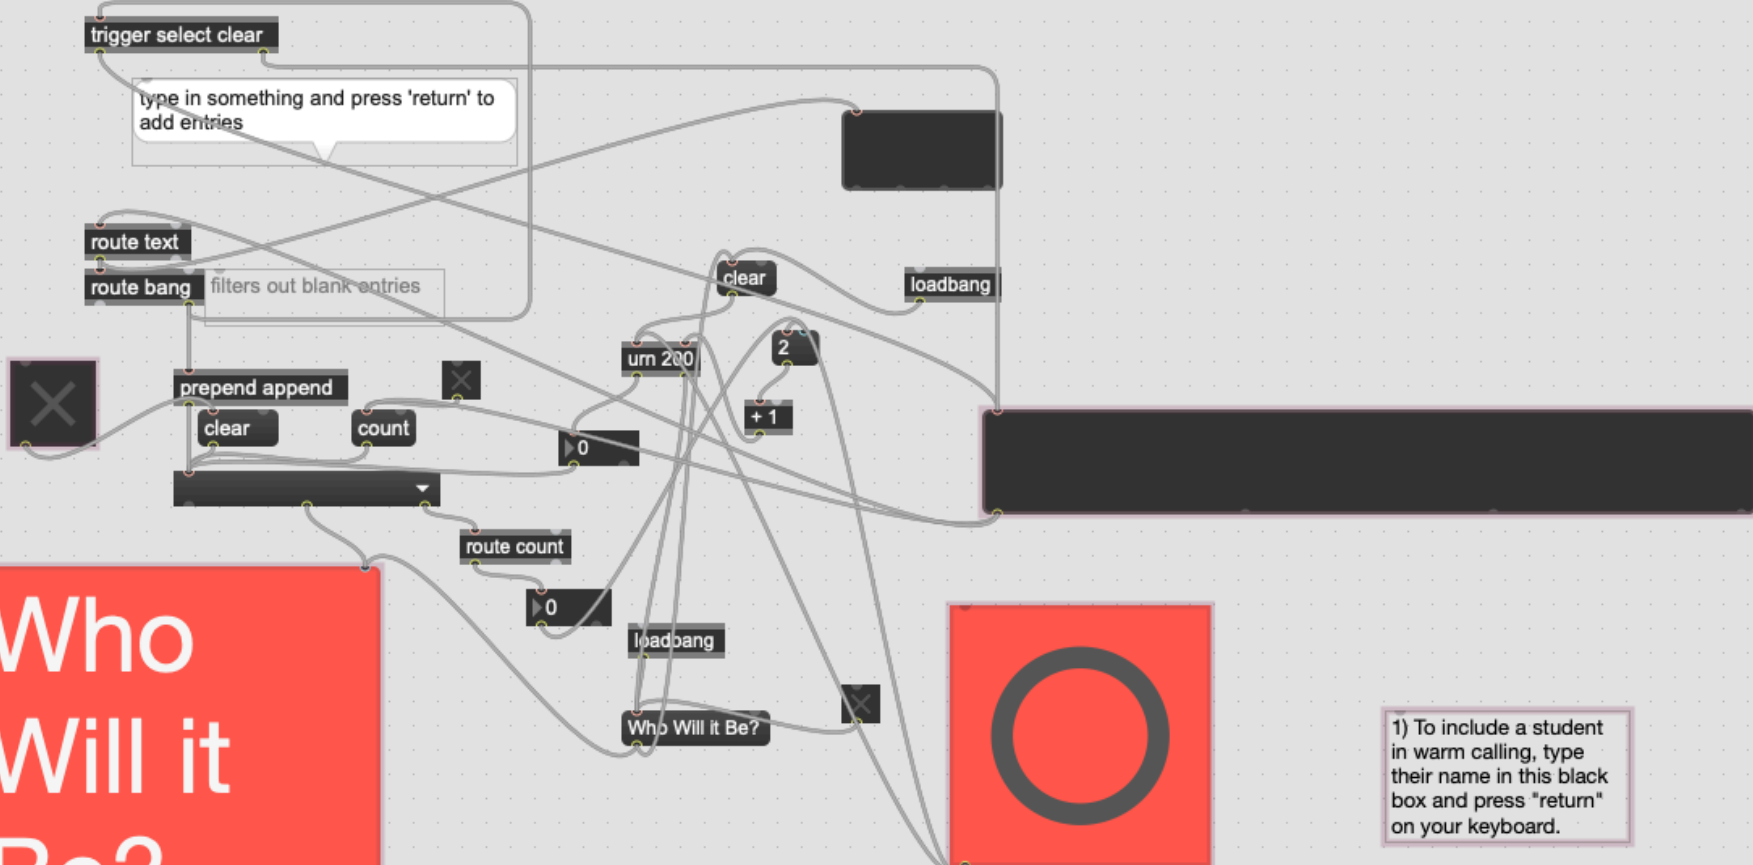

2) To randomly call on a student, press this O button.

Start over:

3) To remove all students from WarmCaller's memory, press this X button.

Who
Will it
Be?
